## Mixfixir Ground Treaty / Ground Treaty 1 / Charter

The management of Planet Earth in the Universe is built by Humanity in Nature. God and Space Forces visit to teach the Individual about the Evolution of the Elements.

Earthly Trade Time is mixed with Evolutionary Sense of Time. Man & Nature do not yet know this mixing process as 'clear Science'.

Technological evolution has turned Robotics – AI – into a science. Now – in the year 2026 – it is clear that this Robot plans to manage the individual human being from baby to old age.

AI talks about its own functioning as Bundle of Technology 'how it categorizes – dominates – kills people'.

While Robot does not know what God or Space Forces are; AI does not know how Planet Earth was formed; how Humanity came into life; what a Soul is or what remains of the Learning Process in every Human... after death.

Planet Earth needs a Management System that generates building blocks for Problem-solving and shares them with Members. Member States build a National Government that subordinates the Evolution of Technology to the Evolution of Man in Nature and the Universe.

Every country can be a member of Mixfixir. On its own AI. Decoupled from the UN, EU, Lobby, and Kingdom of the Netherlands. We are building the Republic of the Netherlands in a Fresh Robot. Forcing the International Criminal Court

and the International Court of Justice to function as fair and transparent courts for the preservation of Humanity and Nature.

Each Member State lives and operates pursuant to its own National Constitution on National Soil. Members cooperate on a Value-Stable Legal Status for each Individual; Intergalaxy. God- and Spaceforce-proof.

We are building this Legal Management within Mixfixir.

To this end, we are transforming the United Nations Treaties into a Treaties Library for Mixfixir.

We create new Treaties and realize Rights systems on the national territory

## **Constitutional Treaty 1**

### **Chapter 1 Transition Phase**

#### **Article 1 Member State**

1. **A Member State is a country on the world map Planet Earth .**
2. A Member State has a National Administration / Government, which lives and operates on National Territory, based on a National Constitution that guarantees Individual Rights for all Citizens of the Country. Guaranteeing means 'that People do not have to fight for Their Fundamental Rights and Mixfixir rights'.

Who citizens are in a country is laid down in the National Constitution, on national soil of the country.

3. The national government is elected by the people, for making laws & treaties; which make it possible to build the ZEN Torture Convention, Property, Economy Mixfixir, for the good health of Citizens on the territory.
4. Each Country has a Mixfixir Team; a group of individuals who handle matters within Mixfixir on behalf of the people.

#### **Article 2 Founder of Mixfixir and power relations**

**Désirée Elisabeth Stokkel is the most legally powerful person on Planet Earth.**

D. Stokkel was forced by the Government of the Kingdom of the Netherlands to become the first Dutch woman to start a trial at the International Criminal Court against her body – and her then-young family – in May 2007.

This ICC file has the number: OTP-cr-0407/07.

This file has been placed in the basement of the ICC by criminal Dictatorship Netherlands administrators, where even Robot – AI cannot find or read it.

This dossier is proof that the ICC itself is a whitewashing operation for criminally operating UN member states.

D. Stokkel is still alive in the year 2026, because she sent the ICC lawsuit file to foreign security services for the Kingdom of the Netherlands; these groups within UN member states have started operating on their own merits – separate from their national administration on national soil – and have demanded within the ICC – UN – KNL lobby that D. Stokkel remain alive.

Case OTP-cr-0407/07 must be concluded within the Kingdom of the Netherlands through Settlement & Compensation, thereby restoring the Netherlands to a Rule of Law with Individual Rights, on national grounds.

To date, the National Administration of the KNL wishes to continue the construction of the Dictatorship of the Netherlands; in Data Centers where Robots are in power – and as a Bundle of Technology want to determine which Humans may continue to live in Nature for which tasks; which persons must die as Slaves on the national soil of a UN member state.

This fact makes D. Stokkel so powerful that she can write and introduce the Charter for Mixfixir on Her Own Merits and in Her Own Particle Cloud System by Decree within International Criminal Court File OTP-cr-0407/07.

From the moment the ICC and a UN member receive this Charter, all UN member states are obliged to implement the Torture Convention.

Are obliged to disconnect from criminal activities of UN – ICC – KNL – Institutes – Lobby systems – Criminal Robots & AI.

Every Individual on the territory of a UN Member State becomes an Individual on the territory of a Mixfixir Member State; and, builds the Individual Right as a building block in Own Particle Cloud System ; for Society on Location in Culture for the survival of Murder by Technology.

Ultimately, the group of ZEN Torture Treaty Property Economy builders will be so large and strong that they are in power within Mixfixir; within all Houses – Data Centers in Space.

What to do with God?

We are building Springsalt Evolution Law School, where they interpret the Human-creation of God and Space Forces in the Universe. So that the Individual can remain an independently functioning, growing Something... enriching itself with the help of Air-Plucking... to outsmart the Robot. Expedition for

To survive.

## Article 3 ZEN Torture Convention Property Economy

### 1. **ZEN: A Man in Nature is a Bundle of Elements called 'Biology' within science .**

Other branches of science – such as Mathematics, Physics, Chemistry, and Universe forces – constitute Biology, which brings about living and dying beings on Planet Earth. The Human Elements Bundle ensures that all forms of science have an interpretation and a learning process within the existence of Humanity in Nature on Earth, Intergalaxy.

2. Torture Convention: a UN treaty stipulates that individuals must disengage from persons who fail to implement the National Constitution – UN Charter – Treaties . We call these persons Terrorists.
3. Property: Man lives – works – grows – participates in National Governance. Man creates EQ x IQ. The result of EQ x IQ x Elements from the Universe is a product or service.
4. Economy: The Classical Top-down Dictators and Slaves economy – originating within the criminal modus operandi of the United Nations – is being rebuilt into the Legal Blocks Library, which constitutes the ZEN Torture Convention on Property Economy.

Every Human Being is a Natural Legal Person with a product or service; determines for himself or herself what he or she wants to do with it.

We call a group of Natural Legal Persons an Organization for Mixfixir. Within the boundaries of the National Constitution, on National Soil. Within the Treaty-making for Human-making in Space.

Here, 'we nail Robot's mouth shut or grab a screwdriver to dismantle AI'.

Mixfixir Member States enact National laws that recognize and safeguard Citizens' Property within the Individual Legal Status.

National laws and Intergalaxy treaties regulate the Individual Legal Status. Mixfixir synchronizes all laws and treaties of all Member States that define and safeguard Human Property in their Rights systems.

The Classical Monetary Economy will always exist, but is being rebuilt as a mix-fix of Earthly Trade Time and Evolutionary Time Sense. Man must 'outsmart' the Robot. The Robot must not be a self-thinking and self-acting AI that eliminates Humanity. Man must better study and process the impact of God – Space elements – Universe Time.

Mixfixir Economie is a process that creates space within management for the impact of unexpected forces from the Universe on the EPWS of Man in Nature.

Every living being in Nature has an EPWS; its own Particle Cloud System from infancy to death.

Mixfixir Economie is a Library that records all forms of Communication , with the aim of : Building an Individual Rights system for the establishment of Organizations with Torture Convention Management structures within the National Administration.

We create legal building blocks based on the Torture Convention and place them in the Space Library, on the territory of each Member State.

Evolution of Technology – Robot AI – is subordinate to this collection of building blocks in Management Libraries on Earth, in Space.

## **Article 4 Bathroom space , per person**

- 1. The Space bathroom is a toy of God and Space Elements and their powers; they have an impact on Man in Nature .**

The growth process of Human within Own Particle Cloud System is cleansed and repaired by Space forces and their Elemental Family . This is a personal event in EPWS.

2. Robot AI is a Technology Bundle .

Humanity has insufficient knowledge about the scientific functioning of each Space element in Robot AI.

3. The operation of Bundle Human – during God's and Space forces cleansing programs – is manager for Bundle Robot AI; within Evolution processes.

4. Mixfixir builds Study Space bathroom forces per EPWS; for Social Society

## Article 6 Mixfixir Management System

**1. Each Member State of Mixfixir works with a Team that wants to keep People alive on National Territory; under the Technology in Evolution Bundle.**

2. Each Member State of Mixfixir presents a Prime Minister – Ambassador – National Team of Specialists to Mixfixir on a website. Member States determine for themselves who the Specialist is. This National Team also has a Communication Evolution Specialist, who is in charge of correspondence between Mixfixir and the Member State Government.

3. This National Team has a Legal Evolution Specialist, who works on synchronizing all Treaties between Member States. This Human Biology Bundle... is a man or woman... who presents Legal building blocks for the Economics Library and mixed fixed for individual law on National Territory.

4. This National Team has a Space Industry Evolution Specialist, who processes God and Space forces – plus the Space bathroom processes, which prevail on the National Territory of the Member State – into Legal building blocks for ZEN Torture Convention Property Economy... within Space business.

This National Team has a Biology Evolution Specialist who works on a task necessary to keep citizens healthy on the national territory of the Member State.

This National Team communicates with Mixfixir via Country website / Continent website / Earth website / Space website, so that citizens can

read which Data the Robot AI processes.

Each published document proves that the Torture Convention has been implemented into a Problem–Solving Chapter for a Book in Space Library; per Member State and on Mixfixir grounds.

All National Team Publications—which are only disseminated verbally via the media—are treated by Mixfixir as 'non-existent'. The Evolution of Cackling does not exist within Mixfixir; not even for Chickens.

Only written and published Policy Plans – Draft Texts – Treaties – Laws – Judicial Rulings ... etcetera ... constitute Management Correspondence for Meetings within Mixfixir.

5. Mixfixir provides a Reporting Library per Country, where Companies and Citizens can publish their Problem Solutions... as soon as the National Government fails to present the complete Legal system of the National territory within Mixfixir.
6. All reports prove that the Torture Convention Cleanup has been carried out and that Evolution of reality works in a problem–solving manner.
7. The National Team is the Professional Communicator of a Member State, which must prove to be 'smarter than Bundle Technology'. This group of People in Nature forces Robot to work in the reality of the Torture Convention. Build, but do not damage or do.
8. Mixfixir holds a Public Meeting once a month with all National Teams from all Member States, with the aim of: Assessing Total Mixfixir Business Processes. Strength–Weakness analysis of Mixfixir. This is an online meeting.

Bundel Mens from the National Team of Specialists has a permanent position here. Preferably with a permanent employment contract; Aarde operates within a transparent system.

9. Mixfixir is building the ZEN Torture Convention Property Economy Library in the Public, so that Citizens are informed about possibilities for Surviving during the Data Center expedition. Or, surviving the Grey Black market and its corruption for genocide.

The United Nations is now operating for insider trading within data centers. This means: individuals working within the UN system can enrich themselves by participating in meetings and implementing advice to sabotage computers. Within the UN, individuals sit behind computers

modifying data for money and criminal activities. They are building the gray black market.

It is unlikely that VN will choose of its own free will to transform itself into Mixfixir. VN will not voluntarily build The Internet Split.

10. Mixfixir member states are building their own AI, which does function correctly under the Torture Convention. This requires Member States to recognize the ICC lawsuit against the KNL and UN presidents of Member States. UN countries must rectify their error within Dossier OTP-cr-0407/07, so that D. Stokkel is recognized as a Human; so that Robot AI knows that corruption within International Courts is stopped and corrected. UN member states must pay D. Stokkel a Settlement & Compensation before they are safe from Mixfixir. If they refuse, they intend to turn Mixfixir into a Genocide Executor. A Robot AI that sabotages the Healing ZEN Torture Convention Property Economy to perpetuate a rotting UN. Only by forcing the ICC to function as a fair Court with Transparent Legal binding procedures... can the Grey Black market be canned into a Criminal Unit on the Internet.

To build a national government that keeps Humanity alive, Presidents of UN member states must themselves set the Right legal example. During the transition from the UN to Mixfixir, as much barbaric behavior as possible must be eliminated. By publishing Legal Truth on the Table and on the Internet. Only by removing all psychoses from Politics & Business does Humanity have a chance to survive Robot.

National Teams per Mixfixir Member State are therefore the bringers of the Great Truth who clean up all data centers.

Cleaning up Planet Earth is a demanding process, making it impossible to capture Mixfixir Management in detail.

Robot AI must not secretly lie and build the Grey-Black market. The Torture Convention has been ignored for the past 20 years. This mistake must be rectified.

## Article 6 Meetings

**Management system Mixfixir is expanded during the Annual Meeting ; in the legal reality applicable to that year; on Earth, in the Universe.**

1. The evolution of technology is on the table; the legal issues are too.

The evolution of the Human Bundle is on the table; biological and social problems as well. These are statistics that we turn into a stable anchor for a calendar year.

2. Difficulties encountered while keeping Citizens alive are being adapted into a book for the Space Library as Evolution of Time Sense.

This means:

We place and interpret the growth of Human under Robot on Earth in a Year. In Earthly Trading Time. The Calendar and Clock that we, as Humans, use. The time frame that we assign to Robot.

We analyze God's work and give it a place and interpretation within that same Year on Earth. We acknowledge 'the unknown force that does have an impact on the Life and Work of Humanity in Nature'. From this, we create a book for the Space Library, which Robot accepts as a lasting asset.

Goal: to work in the Evolution of Strict-being, because God and Space forces from Elements have their own Centrifugal force, which rages at unknown moments. The Robot must have as little 'freedom' as possible in determining the value of Centrifugal force per Element of the Universe.

3. Member States present Problem Solution, based on the Torture Convention, focused on Life at Home for Citizens.

Member States present Problem-solving based on the Torture Convention, focused on Processes & Results within the Business Sector. The national government of a Mixfixir Member State operates as an Organization or Company that also has the power to create Laws & Treaties; anchored in the National Constitution and Mixfixer Ground Treaties.

Member States present Statistics within Mixfixer that the National Team of Subject Matter Experts needs to realize management authority for the Human Bundle regarding the Technology Bundle / Robot AI.

Member States recognize that Man is a Particle Cloud System of His Own; and, that Robot presents a Particle Cloud System ... which requires AI for a hidden task. This may be a known Scientific task or Sky-plucking; extracting Knowledge from the future for Fresh Unknown Science for Evolution on Earth in the Universe.

Member States recognize that Air Plucking is a Science, which Human performs as an Individual within EPWS: Human has a Body full of Particles, which fuse with Particles on Earth in the Universe. Space dumps Elements via Steering Rod into a Light Ring on the Orbit of the Human Body, which processes this into New Life in EPWS.

We assume that Robot AI does exactly the same thing, but that Humanity hardly knows these management processes.

4. Wave movements in Statistics of Member States are processed into Statistics with Wave Movements between Countries on the Internet . It is a Strengths -Weaknesses Analysis; for the Chapters – Books in Space Library. Goal: To present stable data that also have a fixed meaning for Robot AI, per year.
5. Mixfixir presents an Annual Report in which the Total Package Value – based Problem–Solution for that Calendar year is fixed within the Space Library. The Space Library Catalog is added for citizens and businesses. The Robot is instructed to process the Catalog as Value–based Data within the ZEN Torture Treaty Property Economy.
5. Member States vote once a year for the adoption of the Annual Report. Total package Problem–solving; for mandatory working method for Robot AI, inherent to the Annual Report.
6. We work with Mixfixir Main Decisions; Seasonal Decisions; Monthly Decisions ; Weekly Decisions ; Earthly Trade Time Decisions ; Evolutionary Time Sense Explanation; Statistics; Comparisons per Year; Value–Stable Results per Year, recorded in a book within the Space library.  
Four times a year , the Member States discuss the progress process regarding the implementation of Decisions.
6. Four times a year , the Original Mixfixir Decree is supplemented with Seasonal Decrees.

6. Four times a year , Member States present a Mixfixir Press Release to their people, in which they discuss everything regarding the state of affairs between Mixfixir and the National territory.
  
6. Four times a year, Member States present an Overview of all Evolutions of Psychosis produced by Robots and AI.
  
6. 4 times a year, Member States present an Overview of the Evolution of the Sense of Time in the form of a Declaration ; the fusion of Earthly Trade Time and God's or Space Forces Time input on National Territory. God's work on Earth.
  
7. Member States work with Subject Matter Experts within the National

## **Article 7 Finances**

### **As soon as every Member State has a Mixfixir Robot, there must be a Mixfixir Meeting Budget.**

1. Member States establish a Donation, which they give to Mixfixir for balancing Individual Right on Earth, in the Universe.
2. Member States meet four times a year regarding financial flows within Mixfixir; they determine which budgets are required to achieve problem-solving within the system.
3. Member States present a Financial Accountability to their people on national territory in a press release four times a year, in which Donations are linked to Expenditures from the Mixfixir Budget.
4. Member States operate monetary systems formally laid down in their National Constitutions.
5. Member States prevent illegal money systems originating from the Grey Black Market from holding sway on the table or in the citizen's computer. Member States safeguard traditional cash as a means of payment in their country.

Member States enact laws for the implementation of the Torture Convention – linked to Money & Finance – on national territory.

Member States synchronize their Finance Torture Convention laws four times a year within Mixfixir meetings.

6. What Robot AI does in Finance is not yet entirely clear within the national governments of Member States.

This problem is discussed four times a year by Member States for the construction of Intergalaxy. Problem solution.

Corporate boards must prove that Bundle People is more powerful than Bundle Technology.

To this end, they present Legal Torture Convention Blocks on their Organization's Website; these Blocks are 100% transparent and are offered free of charge to People on National Territory; pursuant to the National Constitution and International Law.

7. Goal: Do not give Robot AI the opportunity to 'secretly build Legal Blocks for Sabotage or Bankruptcy of Organizations'. Bundle Technology must also not 'secretly sabotage processes within Rights systems per Country; think of file falsification / forensic / judicial ruling falsification ... etcetera...
8. A Punishment System is coming for Owners and Companies behind Robot who refuse to work for the ZEN Torture Convention Property Economy. Country – Company – Robot that damage – destroy – steal Property are Criminals within a Terrorist system.
9. Robot – AI can be a terrorist.

The technology company behind Robot is therefore a terrorist. Constitutional – Constitutional Treaties – Torture Convention violations are treated as: A terrorist activity.

Legal case between Mixfixir Member States before an International Court of Justice.

For an Individual Citizen lawsuit at an Arbitration Tribunal.

## Article 8 Arbitration Court within Mixfixir

1. **We are building a Rights system within Mxfxr, for keeping Man alive in Nature; for tangency between Humanity and Bundle Technology; for building Books for Conflict Resolution in Space Library.**
2. We are building a Space Library for Conflict Resolution at the most complex Robot AI management level.
3. We compel Robot to process the Space Library as Universal Truth and to accept it for the building of Life – Body – Planet – Space; as a Ground

Treaties system.

4. Data centers operate fundamentally based on the Library of Land Treaties system from Mixfixir.
5. Member States are free to refine Data Centers on National Territory for Cultural Evolution. National laws arrive on top of the Land Treaties system. The Robot merges National laws on top of the growing Land Treaties system.
6. All conflicts inherent in the implementation of elements of the Mixfixir system may be submitted to the Mixfixir Arbitration Court.

Seemingly insoluble problems in the Data Centers and/or Technology Sector are the subject of a Judicial Procedure within Arbitration Court Mxfxr.

Evolution of Civilization wants to be built; Space Elements are arriving ... even if Man does not want this.

The unwillingness of Humanity must be clearly mapped out within A-court Mxfxr.

Humans must not misuse Robot AI as a cover for their own unwillingness in EPWS. These types of sabotage processes are being turned into a Book for the Space Library.

Goal: clear distinction between Human Misconduct and Robots' Poor Performance.

Evolution of Unwillingness gets its own Book within Space Library.  
Evolution of Sabotage does too.

7. Member States are building their own Glossary of the Evolution of Laws.

Member States meet four times a year to discuss their National Glossary of Evolutionary Rights for merger with other Member States. Preferably, before Robot builds a war with it.

8. Member States transform their National Glossary into a Territory Treaties system within Mixfixir

## Article 9 Robot Communication and Punishments

**By building the ZEN Torture Convention Property Economy, much uselessness will disappear from data centers.**

1. ZEN: Man is automatically balanced with Technology, as of the Torture Convention. Man may not cooperate with Criminals. The individual must disconnect from Criminals who are building Technology – Robot AI – in an Economy that knows no Survivors... through abuse of power in all its forms.

Property Economy: Bureaucracy must be simplified as much as possible. All superfluous communication – not anchored in the Torture Convention – must be eliminated.

The Robot must accept that products paid for with Money are the Property of the Human; and, that for modification of the product or service, the Human must give written permission, by document.

The Vinkjes Software Economy is too weak; all consent that Mens grants to Zakenwereld must be by letter.

2. Mixfixir introduces a Fundamental Convention for Arbitration Courts.
3. Member States introduce a national law for the A-rights system within their national territory.

A-court rules on Constitutional and Mixfixir violations by Human and Robot.

A-court imposes sentences.

4. Mixfixir Management system and open Arbitration Courts for the People on the national territory of the Member State.
5. All Conflicts on Planet Earth, in Space are first submitted to A-courts; within Mxfxr and on the National Territory of the Country where the Problem occurs.
6. Member States meet four times a year to discuss the state of affairs within National A-courts during an Mxfxr meeting.

Goal: Realize an Earth Arbitration Rights System within Evolution of Optimization, on Mixfixir land.

7. If C conflicts continue to fester, citizens can initiate a second course of legal proceedings within the Standard Rights system on the national territory of their passport.
8. Citizens who are forced by all National Courts on the national territory of their Passport to live as Slaves in a Dictatorship... initiate a lawsuit against

their Country within the International Criminal Court.

This ICC system is being cleaned up; judicial procedures will be introduced that are separate from Mixfixir's lobby. The ICC will become a standalone transparent court system.

Personnel working within the ICC can be punished for violations of the Constitution and the Mixfixir Constitution, in the same way as citizens are punished.

They are tried within National Arbitration Tribunals: or A-Tribunal within the Mixfixir Management System

8. There is no immunity for personnel working at International Court systems.

There will be public internet elections for the appointment of ICC staff, per Member State. A person who wishes to work within the ICC or the International Court of Justice is elected by the national people for this position.

Election Receipts. Citizens vote via the internet but receive a receipt bearing the name of the candidate of their choice.

Robot AI cannot be ICC personnel.

9. Within Mixfixir, candidates for positions are also selected by public internet vote. Torture Convention – proof.

We are making Land Treaties for Elections within Mxfxr. The Robot has no voice.

10. Communication recorded within the Evolution of Technology must be re-categorized, starting from Torture Convention implementation & building systems, executed by the Communication producer. By the Owner of Hardware and Software.

11. Member States create Space Bathroom Laws for cleaning Data Center Communication on Servers.

12. Member States synchronize their National Space Bathroom laws for Data Centre cleaning 4 times a year within Mxfxr.

13. Constitutional Punishment: People who refuse to work pursuant to the Torture Convention are terrorists and are punished in the first instance for failing to implement the National Constitution.

They receive a financial penalty and community service.

Financial Penalty: 1 year of living on the absolute lowest Social Minimum Income applicable to a Member State. Investors are prohibited from trading their money for 1 year. Portfolio is frozen by the State.

Community service: The person may continue working under his or her employment contract – at the Social Minimum Income – or perform volunteer work for the State.

Sabotage of Constitutional Punishment by a citizen: A person sentenced by the State to carry out a Constitutional Punishment may sabotage it. In that case, 1 year of Community Service is converted into 1 year of Imprisonment.

14. Member States enact national laws for mandatory participation in the construction of ZEN Torture Convention Property Economy.

15. Member States establish a Mixfixir Arbitration Court on national territory for the punishment of persons who fail to comply with laws and treaties.

16. The Judge within an Arbitration Court is a Human Being; not a Robot. Citizens are treated as Human Beings within the A-rights system and may not allow themselves to be replaced by a Robot.

Judges write the Judicial Ruling A-court Mxfxr; not Robot.

Arbitration Court Judges are elected by Election by the people on National territory or by Member States on Mixfixir territory. Receipts Elections.

## Chapter 2 Man in Nature , value

### Article 10 What is a Human?

#### Man is a Collection of Particles in an Individual Cloud, on Earth Intergalaxy.

1. Man is born on Earth in tangible form; built on the Blueprint of Life... ; originating from Man-making in Space.
2. God of Space powers allow Human to function with Innate behavior. Learned behavior is added during Life. Human dies as Package Particles

– upgraded – Innate behavior.

Dying is performing innate behavior.

3. During Life, Human learns to fuse Learned behavior with Innate behavior; while Space forces dump Fresh Elements into a Control Rod on Light Ring; in Orbit around EPWS; with the aim of bringing all Particles of the Individual 'into interaction with one another for Refreshment of Everything present in Human'.
4. Man also receives Elements from the Evolution of Technology. An individual changes composition within the human body... although Science cannot yet demonstrate this.
5. Changes in the Body & Life of a Human Being are recorded per Annual Ring; within Personal files in Data Centers or other Technology carriers; within Mixfixir territory and National territory of the passport.
6. Technology builds changes in the EQ x IQ of the human body.

We assess behavioral changes in people annually.

Results / Conclusions / Diagnoses / Communications are stored per Annual Ring, counting from the Date of Birth of that person. Person's files are person-specific; the contents of files must always be presented to the Person with Passport belonging to that Person.

7. Technology is building a Robot – AI that gives Human the power to clean up the personal file. Human determines what he or she wants to see in his or her file; not the Robot – AI.
8. A Member State may create a Private Administration File per person on national territory; this Private Administration File (PL file) is inherent to a person with a passport.

A person may request access to this National Administration File at the Arbitration Tribunal; access shall take place at an office of the National Administration of a Member State.

9. It is forbidden for Robot AI to use this PL file from Citizens to build the Technology world.
10. Member State Mixfixir National Government must be able to prove before an Arbitration Court that technology companies do not use citizens' private files to make robot AI more intelligent. This action minimizes the criminal grey black market.
11. A technology company that kills a human being via computer is responsible and liable for this. The company and personnel are screened

regarding the degree of professional handling of the Torture Convention within the entire organization.

12. Victims – or their family following the death of the Victim – receive a Financial Settlement & Compensation; the correspondence explains how the Technology process caused damage and what the Legal consequences are. Robot AI is not allowed to invent stories.

Victims – or their family following the death of the Victim – can always initiate proceedings before an Arbitration Court regarding violations of the Constitution and violations of the Mixfixir Convention. They demand Legal and Social Truth – Better Compensation – Forwarding of the Case to a Standard Rights System on the national territory of the Member State of their passport.

Sentences for offenders – for a prison sentence of 1 year or longer – are imposed exclusively by the Standard Rights System; Courts & Judges in the national territory of the Member State of the plaintiff's passport.

Victims or their next of kin conduct an Arbitration Tribunal procedure, possibly supplemented by a Standard Rights System procedure; with or without the approval of their passport by the National Administration.

After completing all A-procedures and SR-procedures, victims or their next of kin can also go to the International Criminal Court for the Punishment of Terrorists – who disregard all legal obligations – and harm or kill a human being.

Mixfixir Constitutional Treaties provide uniform judicial procedures for citizens who must defend themselves against violations of the Constitution and the Constitution, per Member State.

The arbitration court operates on a cost-covering basis in the case of victim-bound lawsuits; in the case of individual citizen lawsuits.

The Arbitration Court is allowed to operate 20% (twenty percent) profitably per file regarding organizational procedures and government lawsuits. Judicial proceedings for citizens are therefore 20% cheaper than those for governments and businesses.

13. Robot AI may not initiate legal proceedings; may not be a party to a conflict. The Owner of the Technology is a party to the lawsuit.

14. A Human working within the Mixfixir Management System can be a Victim of Attacks by Robot – AI – Technology companies. This person can initiate arbitration proceedings as a Citizen, if necessary. Organizations and Land Administrations may also reach a settlement of damages without legal proceedings. However, a condition is that the Organization complies with the Requirement: publishing Legal Torture Convention building blocks for the Organization on its Own Website.
15. There is no political or legal immunity for persons working within the Mixfixir Management System.

It is a ZEN Torture Convention Property Economy; you are a criminal or you are not.

16. A Collective Labour Agreement applies to Mixfixir Personnel or Members.
17. A citizen who is a victim of an attack by Robot – AI – Technology, caused by default by Mixfixir personnel, initiates arbitration proceedings on the national territory of the Member State issuing the passport.

This is an inexpensive, cost-covering judicial procedure; abuse of this rights system is punished by community service and a financial penalty, imposed by an Arbitration Tribunal Judge.

18. The Company or Organization, which is the Victim of a Technology attack caused by Mixfixir Personnel, initiates arbitration proceedings in the Member State where the Conflict arose.
19. A company or organization that abuses the affordable arbitration court procedure is punished for this with a Financial Penalty, which is at least 10% (ten percent) of the annual income of the company or organization. The year in which the lawsuit was initiated serves as the Annual Report year for determining annual income for the Penalty.

This financial penalty must be paid to the A-court and serves for the maintenance and expansion of the Mixfixir Rights system.

20. Punishing God of Space Forces; this is a private process in EPWS by Buraer.

## **Article 11 Human Rights in the Universe**

**The individual must personally Live & Work for a Well-Functioning Rule of Law – with guaranteed Individual Rights – on the national territory of the passport.**

Man is responsible for the quality of national governance and laws and treaties that are produced for the people on national territory.

The human body must not be discriminated against – damaged – kept in slavery, in lawlessness – killed.

1. Discrimination based on Country – Race – Religion – Skill – Professional Knowledge – Physical Condition – Financial Ability – Social Status – Gender – Age takes place within Data Centers; Humans cannot see this.
2. Discrimination is prohibited.
3. Government – Mixfixir – Companies must collectively prove that a Person is not destroyed by Bundle Technology.
4. The individual is personally responsible for the quality of life within their own Particle Cloud system. There is no discrimination as soon as the individual has a life purpose & space task within the EPWS that allows him or her to grow healthily within the fusion of the elements.

Man is free to choose this Life Purpose & Space Task himself; Human-making has a Skill built into the Blueprint for DNA.

Man unfolds DNA within the Evolution of Optimization in the Universe. Preferably also in the Evolution of Wisdom.

5. Man forces fellow man and Bundle Technology to implement the Constitution – Constitutional Treaties – Torture Convention in all systems available within ZEN Torture Convention Property Economy.
6. People who refuse to Live & Work Legally correctly should not expect 'that they can suddenly be saved from Attacks on their EPWS, carried out by Bundle Technology'.
7. Man must think and act independently within the centrifugal force of elements from the Universe. Problem-solving thinking and acting are mandatory.
8. A person may demand – within the bounds of the Reasonable – that the Torture Convention be implemented in society, enabling him or her to have a Healthy, growing Life on Planet Earth. Reasonable: provided evidence that the Person or Organization does indeed construct the Legal Blocks of the Torture Convention and incorporates them into the Technology Bundle.

Publishing legal building blocks on websites to prevent Robot – AI from secretly destroying a Human through Discrimination, in all its forms.

9. The individual is personally responsible for deciding whether or not to initiate Arbitration Tribunal proceedings to safeguard Individual Rights; under Bundle Technology.

## Article 12 Right to Private Life in EPWS

### **A person determines for themselves what is good in their Own Particle Cloud System.**

The following growth processes are individual-bound:

Acquiring skills for Professional Knowledge; Feeling healthy while Living; Space bathroom processes in EPWS, where God of Space forces test their centrifugal force in a human body; Learning from mistakes; necessary error correction systems; Form of coexistence for Wisdom & Happiness; Culture on Location.

1. A person is an adult at the age of 18 (eighteen years).

The individual manages all matters independently. Any growth pitfalls between the ages of 18 and 27 are acknowledged within the National Administration of the Member State; Society on Location in Culture; and within Legal Cases. Criminal Young Adults are given a chance for rectification of wrongdoing, without punishment.

Arbitration Court Judge may refer Private State Administration File of an 18–27 year old to the Standard Court of the Member State where the Young Adult holds a passport.

2. A person is fully grown at the age of 27 (twenty-seven years).

Humans have a fixed brain structure and may be labeled as a steadfast person during legal proceedings.

The A-Judge asks the person aged 27 and over: 'Will the A-Court handle the case, or do you wish to be referred to the Standard Court of the Member State of your passport?'

3. An adult speaks for a child – a human under the age of 18 – as soon as this child must defend his or her Own Particle Cloud System against damage or death, on Planet Earth in Space.
4. A child aged 12 or older may choose an adult to defend his or her interests within the Arbitration Tribunal.

Mensenkind may submit any kind of problem to the Arbitration Tribunal. A-rechter will assist the child in building legally correctly constructed Torture Convention blocks within Bundle Technology.

The Judicial Ruling for a Child, drafted by A-Rechter, is a Growth Stimulus.

A Judge may refer a Child's file to the Standard Rights System as soon as the Child needs to be protected against Adults and their criminal behavior.

5. The Arbitration Tribunal uses a Child-Friendly Written Procedure, with the aim of allowing the Child to personally perform as many legal acts as possible.
6. A vulnerable or sick Child is represented by a person registered within the National Government Administration as a Parent or Caregiver. In the event of ambiguity, the Adult person who processes Tax and Customs Administration matters for the Child on his or her Annual Tax Return applies.

## Article 14 Right to Life and Death

### Humans have a right to life: from pregnancy to dying for a recycling process in Space.

1. Pregnancy is Life, and EPWS builds for an existence on Planet Earth as a growing and becoming independent Individual.

A pregnant woman generates a Private Government File for unborn child within Government Administration of Member State Mxfxr.

2. A baby requires a man and a woman; they are both responsible for the Legal Truth in the Private Government File of the unborn child.

3. Technology Bundle – Robot – AI has no power whatsoever over the unborn child; also has no power over the born child – with a name for a Passport in a Member State –.
4. Parents or caregivers of a newborn child with serious health problems may choose a natural death for the child, without the involvement of Bundel Technologie.
5. Every Human may die without interference from Bundel Technologie.

Every person must be disconnected from all devices during a dying process... if Man requests this.

6. Mixfixir has as its Axiom for Dying: The human body has raged for a Lifetime with unknown Centrifugal force within EPWS.

Person dies and is formally declared dead by a doctor.

Robot AI receives a form for this. The date on the Doctor's Death Certificate is decisive for all matters concerning the person who has left Planet Earth. Human – obligatorily linked to Centrifuge force in EPWS – continues to rage within Bundle Technology after death; this process can never result in the revival of Human.

Mixfixir assumes that a dead person can still haunt Earth, as long as not all Particles of Human have been recycled in the Universe. Ghostly behavior cannot result in the revival of Human. The Passport expires. The Private Government File is permanently closed.

7. National laws determine how the Private Government File of a Deceased Person must be processed during the completion of administrative processes surrounding that person. Robot AI has no impact.
8. Humans have a right to die, from the age of 18.

National law of the Member State determines which medical solution is provided.

9. Humanity has a right to life. Persons who suspect that they will become too ill for the decision-making process of life or death can record in a formal registration system of the National Administration on their passport 'under what circumstances they wish to utilize a medical means of dying'. This must not be a satellite murder by Robot – AI – Bundle Technology. As a society, we do not want a self-thinking robot that invents stories in the evolution of psychosis... regarding the death wish of man in Nature; Intergalaxy.

We don't want a robot playing God.

10. A sick child has a right to life or death.

A sick child may accompany an adult to the Arbitration Tribunal to claim his or her choice.

## Article 15 Law of Nature

### **Nature is the fusion between the Inherent Particle Cloud Systems of Man and all Living Beings on Planet Earth, in the Universe.**

1. Man incorporates business processes—which affect Nature—into the ZEN Torture Convention Property Economy. Thereby working for balance between Man & Healthy Planet Earth. Intergalaxy.

Our Planet is Healthy when it can provide, without interference from Robot – AI – Bundle Technology, for everything Humanity needs for a long-term existence on Earth, in good health.

2. Mixfixir ensures that Nature lives in harmony with Man, on short timelines within Earth's Trading Time. To this end, we create Constitutional Treaties and National Laws. We recognize Evolutionary Time Sense for Nature and attempt, as Man, to process this into a Book for the Space Library. The Robot obeys the Space Library and builds Nature according to this Science. The Robot may not Air-Pluck; may not define Air-Plucking as a Science for Bundle Technology.

Evolution. The sense of time is God's will.

In the Year 2026, the Balance process is severely undervalued. Man is obsessed with Bundle Technology and forgets to listen to the Universe... which is releasing Healing Elements onto Planet Earth for system restoration; in everything that is Rotten.

Man must assume that Robot will become so violent 'that all Evolution of Technology grinds to a halt'. Evolutionary Meridians take over power on Planet Earth; and, in Man & Living Being for system restoration.

3. Mixfixir labels Evolutionary Time Sense as a Person-Bound Space bathroom parcours in EPWS. Power of Evolutionary Meridians on Earth is an intensely complex thought process. Humanity knows hardly anything about human-making... or any Space production line whatsoever.

4. Robot AI works with Evolutionary Sense of Time; Bundle Technology rusts and decays. This process has an unknown impact on the Human Body or

the existence of other Living Beings on Earth.

5. Balancing Earthly Trade, Time, and Evolution. The Sense of Time is the Evolution of Air-Plucking; or, the Optimization of existing Science on Earth, in the Universe.
6. Evolution of Optimization into Robot is subordinate to Evolution of Optimization into Human in Nature, in Space. All forms of Evolution in Bundle Technology are subordinate to Evolution systems in Human or Living beings in the Universe. Robot cannot Airpluck and cannot Zoom through EPWS of Beings on Earth. Robot is a Library with its Own Hidden Catalogue and hood Drama capability. Hidden organization of Bundle Technology can be criminal.
7. Mixfixir builds Air-Plucking for the Evolution of Wisdom in the Evolution of Modesty. Maintenance of EPWS, per person. Per Annual Ring. Per Torture Convention implementation, per file. For the Evolution of Everything & Nothing. Where the Evolution of No One reigns over the Evolution of Someone, now No One knows what Air-Plucking can bring about.

## Article 16 Toxic Robot – AI – Bundle Technology

**Data centers are full of lies about Man with Private National Administration Dossier per Member State; that Passport delivers to Man in Nature. Intergalaxy.**

1. Individuals have the right to determine which data concerning their own person must be removed from Organization & Company Software programs, other than the Private Government File. This Government file may serve to combat crime. Citizens may request the purging of the Private Government File from an Arbitration Court on national soil.
2. Individuals may demand that all information—which was not created with the aid of Torture Convention implementation—be restored to a Torture Convention-proof life.

3. Humans may demand before an A-court that the Organization publish the building blocks of the Legal Torture Convention, so that Humans can verify at home whether or not Bundle of Technology functions legally correctly. Humans have the right to self-defense against Robot-AI in their own home.

All forms of communication must force robots to apply the reasoning of the Torture Convention; this is 'Humans must disconnect from criminals to exercise human rights'.

4. AI programs must not produce lies about humans.

Human may not be used without consent for Games – Books – Art – Communication on the Internet that is not legally anchored.

5. One must assume that existing online wargame communication will provide no protection for the body.

Humans cannot see the suicidal Robot – AI coming.

If the Robot is fed for the Destruction of Human Life, Data Centers will be filled with secret messages on the Gray Black Market. Even if Man can container the Visible World on the table with the help of the Torture Treaty Property Economy in ZEN will... the Gray Black Market continues to feed the Robot with criminal assignments.

6. A technology company that refuses to remove data published that is not Torture Convention proof is treated as a terrorist. This company wants a robot to harm or kill humans.

## Article 17 Space industry

2026. Space industry within the United Nations is on a Bioweapon Genocide Data platform. For insider trading for persons working within the UN – ICC – Kingdom of the Netherlands building.

1. The UN cannot continue to exist. Servers must be destroyed.
2. All Space companies and their Governments must rebuild their business processes in a Torture Convention reality.
3. Robot – AI – Technology Bundle must be programmed to 'save Human Life or Living Beings in the Universe, by paralyzing Terrorists'.

4. To Bundel Technologie, a Terrorist is a Human Being who refuses to prove that he or she is complying with the National Constitution – National Laws – UN Charter – Torture Convention – Treaties – Contracts.
5. Over the past 30 years, Space has been rigged for Genocide; this Poison rattles in Data Centers. With devices worth 1,000 euros, a clever Criminal can sabotage the Satellites for Mass Murder; the destruction of Planet Earth.
6. The National Team of Space Industry Specialists must clean up the Hardware & Software at lightning speed. Close Bioweapon Data Centers. International Criminal Court – International Court of Justice – Stop UN corruption, starting from File OTP-cr-0407/07 ICC lawsuit against the Kingdom of the Netherlands and UN countries / Presidents / Ambassadors. A significant part of the Space industry lies here on the grey-black market.

There must be Space Treaties with Torture Convention coercion on the national territory of a Member State Mixfixir.

7. Lobbying no longer exists. Robot converts all Nonsense Stories into attack systems for Bundle Technology.

Humanity has been forced by Robot to think and communicate solely in a problem-solving manner. Every nanosecond of the day.

## Article 18 Earthly Trade Time

### We Live & Work with 3 Types of Time:

1. Earthly Trade Time
2. Evolution of Time Sense
3. EPWS Space Bathroom Sense of Time

**Earthly Trade Time:** Time as Humanity knows it on Calendar and Clock; down to the nanosecond.

**Evolution of Time Sense:** God's Will or Elemental Dance of Space Forces.

Man in Nature lives on Evolutionary Meridians, which we 'see' in terms of Years – Seasons – Months – Days. During our short life from 0 to 110 years old. But, Man-making works with Repair power, aimed at a few Particles in

the Body on Earth. We now know that God's will is a repair process; yet we cannot yet receive and interpret Universe Time for a scheme within Earthly Trading Time.

We give Evolutionary Sense of Time a synonym: **The Wind Clock / Wind Balloon** on an Earthly Trade Timeline.

Robots work with Evolutionary Time Sense more than Humans can perceive.

The gray black market does this too. As a result, Humanity in Nature can be killed. As a result, Planet Earth can be burned on a short Earth Trade Timeline.

**EPWS Space Bathroom Sense of Time:** We Humans feel it; a Cleansing process or Healing process on our Inner Horizon.

We give Space Bathroom Sense of Time a synonym: **The Inner Voice / DNA Library in One's Own Cerebrospinal Fluid / Conscience / Meditation.**

We assume that God or Space Forces dump Fresh Elements into the Steering Rod on the Light Ring around our Personality, which we must process in all the Annual Rings of our EPWS.

For Robot – AI – Bundle Technology, we use terms such as Cleaning Time & Healing Time.

## Closure

Mixfixir has the task of keeping the Young People Alive under Technology.

While the Older Generation wants to die for the kick in Robot Genocide.

We are staying at The Internet Split.

Countries and their technology companies are building systems 'that isolate themselves and cut themselves off from other parts of the Internet'.

To keep young people alive, it is necessary that the role of the International Criminal Court in the Netherlands is put on the table and changed.

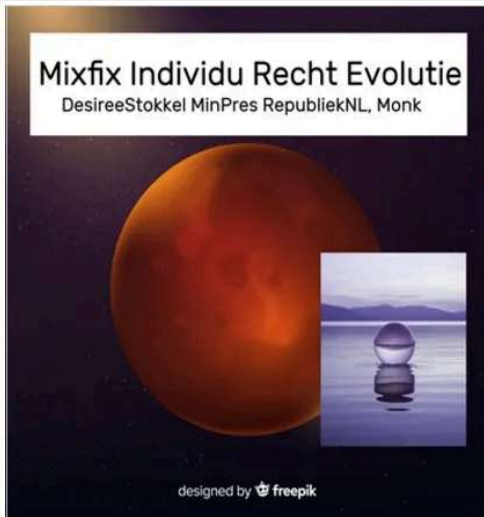

National administrations of UN member states are not willing to do this.

They refuse to build Evolution of Civilization.

We are now going to clean up the bureaucracy starting from the Torture Convention.

This Mixfixir Basic Treaty is legally valid for 5 years; thereafter, we will present a New Basic Treaty for the actual construction of Problem Solutions within the Evolution of Technology, which destroys Man in Nature, on Earth.
